Colby M. White's Resume

- NSCA certified personal trainer and current Kinesiology student at UT-Austin (Spring 2025). Certified in Adult First Aid/CPR/AED by the American Red Cross.
- Professional software engineer since 2010 as a true full-stack engineer (as opposed to a backend dev who tolerates JS) focusing on technical leadership.
- Worked with 50+ startup CTOs during tenure at Fractal Software as an advisor/consultant, helping form teams from scratch. This involved more than just code and focused on building the appropriate business strategy and engineering culture.
- Creator of the JS Everywhere newsletter, chronicling the increasing dominance of full-stack JS frameworks and all of its side effects.
- Working with the RedwoodJS core team as a project lead of the **AutoForm** project which aims to simplify HTML form creation in the Redwood ecosystem.
- Owner of two degrees from the University of Texas at Austin in Computer Science (2012) and Journalism (2010). Currently pursuing a third in Kinesiology.
- Formerly worked professionally at Fractal, Blackbaud, Spanning, CA Technologies, and other companies through contract work.
- Regular at various Austin tech meetups.

▼ Current Software Projects

- **AutoForm**, a component designed to automatically generate a form element based on a given schema. The project is designed to work inside the RedwoodJS ecosystem and is being built in conjunction with the core team.
- **humbleteebox.com**, a project to help golfers find a nearby tee box that suites their skill-set.
- **powerschedules.net**, a project that aims to filter sporting events that are actually worth viewing
- **colbywhite.dev**, which includes a personal blog and an archive of my interesting reads.

▼ Past/Defunct Projects

- Acoustic stack, a minimalist stack for Remix
- tailwind-color-inverter, a utility to invert TailwindCSS colors to auto generate colors for a dark theme
- aws-cf-monitor, a wrapper around the AWS CloudFormation Node API that monitors the progress of CF commands while providing smart logging.
- wordgen, a Ruby gem command-line tool to generate random words
- timbre, a simple tool to issue vagrant commands based on a configured root dir of vms
- Harris County Booking Data Gathering, an Open Austin serverless project that accumulates the booking information published in Harris County's daily JIMS 1058 reports into a search-friendly format. The intent is to aide non-profit organizations looking to do data research across time spans greater than a day

▼ Professional Experience

JAN 2024 - PRESENT

Office Assistant Programs/Memberships

[UT-Austin - RecSports](#) · Austin, TX

- Assisted patrons create and manage their memberships, ensuring efficient experience in Gregory Gym.

MAY 2024 - PRESENT

Software Contractor

[Movement Labs](#) · Austin, TX

- Helped migrate client portal from a no-code solution to a Remix-powered modern application.

JUL 2023 - OCT 2023

Staff Software Engineer

[Reforge](#) · Remote

DEC 2021 - JUL 2023

Staff Software Engineer

[Fractal Software](#) · Remote

- Fractal is a venture studio creating vertical SaaS companies.
- Worked with the portfolio's CTOs in order to coach and advise companies on effectively creating software and teams from scratch.
- Created architecture best practices that served the basis of the portfolio's startup products.
- Led workshops on architecture design, interviewing, domain modeling, and other topics relevant to early-stage startups.
- Worked with several companies to simplify processes in order to maximize velocity.

MAY 2017 - NOV 2021

Principal Software Engineer

[Blackbaud](#) · Austin, TX

- Led team tasked with integrating legacy fundraising product with Facebook Fundraisers in increase adoption
- Created tool for customer wealth calculations that heavily leveraged Kafka for asynchronous processing

- Led front-end team for latest donation form product aimed at allowing users to customize look and feel of forms
- Prompted the formation of a company UI Guild in order to spread UI best practices among teams in multiple locations
- Led cross-team presentations to educate Austin's previously back-end teams on UI development and testing
- Led non-engineering team in efforts to modernize cross-product strategies for help content
- Served as engineering contact with external departments for the presentation and deployment of help content

MAY 2016 - MAY 2017

Contract Senior Software Engineer

Independent Contractor

- Completed work for different companies: Whole Foods (Austin), Nike (Portland) and Xferall (Austin)
- Worked on different types of projects, including front-end, back-end and DevOps tasks
- Used common Java frameworks (Spring, Guice, JAX-RS) in order to quickly build web-based microservices
- Maintained a ReactJS-based web application while prototyping a React Native mobile app

SEP 2015 - MAY 2016

Senior Software Engineer

[Spanning Cloud Apps](#) · Austin, TX

- Contributed features as a senior member of the development team for company's Google Apps Backup product
- Created Chef recipes to help enforce consistency between the team's multiple environments, including local developer-focused Vagrant machines and production stacks
- Diagnosed and corrected front-end performance issues in order to scale SaaS application for large, enterprise customers

MAR 2014 - SEP 2015

Software Developer

[CA Technologies](#) · Austin, TX

- Developed infrastructure and libraries for browser-based Selenium testing of a SaaS application
- Coordinated REST-driven interaction between dynamically scaled microservices of different languages (Java and JavaScript)
- Created Vagrant-based environments to encapsulate dependencies and encourage rapid, iterative development
- Built several custom Gradle and Rake plugins to put project's deployment procedures into code

NOV 2010 – MAR 2014

Software Developer

[Allure Energy, Inc.](#) · Austin, TX

- Built RESTful APIs to facilitate communication between multiple types of devices in order to sync several types of data
- Used OSGI platform for deployment of Java software to allow for dynamic removal and inclusion of different modules
- Created XMPP messaging schemas to facilitate communication between thermostat and mobile devices
- Implemented user interface designs via Qt on an embedded device
- Developed in-house admin application leveraging the Django framework
